

LIST OF TRACTION ELECTRICITY RATES FOR 2009-10

£ per KGTM

This Price List includes charges for the following:

- freight operators

To most accurately reflect the actual costs to Network Rail of providing traction electricity the Traction Electricity Rate for 2009-10 shall be the rates given in Table 1: updated in accordance with the formula:

$$\text{IIEC Adjustment Factor} = 1 + \frac{(\text{IIEC}_{t-1} - \text{IIEC}_{t-2})}{\text{IIEC}_{t-2}}$$

this calculation to be rounded to three decimal places,

where:

t is the Financial Year 2009-10 in respect of which the Adjustment Factor is being calculated

IIEC_{t-1} is the mean value of the Index of Industrial Electricity Costs published

IIEC_{t-2} is the mean value of the Index of Industrial Electricity Costs published or determined in respect of the Financial Year which precedes the Financial Year referred to above.

Where the “**Index of Industrial Electricity Costs**” or “**IIEC**” means the index of prices of fuels purchased by the manufacturing industry in Great Britain, electricity purchased by moderately large users, published quarterly by the Department of Business, Enterprise and Regulatory Reform.

Table 1: Traction Electricity Rates (2008-09 prices)

£ per KGTM

Freight Train Operators

Service Group	Category	Rate £/KGTM
0302	Mail / Parcels /ECS	£ 2.16
